

Faxination Private Cloud by Fenestrae

Faxination's Private Cloud solution is a highly optimized, SaaS cloud fax platform that limits data to only your organization. It offers an extra layer of security to ensure safe delivery and receipt of faxes that empowers your staff to easily send, access and exchange the information they need to execute against business objectives.

Faxination offers an ideal solution for businesses looking for the flexibility of cloud hosting with the security of dedicated infrastructure. From financial data to intellectual property, you can rest assured that your assets are secure within Fenestrae's private cloud environment.
